

## Golden Mineral

### Mineral Supplements

#### Mineral supplement for horses

This supplement is very beneficial when the usual feed ration does not meet the all vitamin, mineral and trace element requirements. Minerals are of elementary importance in the development and maintenance of strong and resilient bones, tendons, joints and muscles. Vitamins play a very important role in many metabolic processes; they also protect the body from free radicals and strengthen the immune defence. Trace elements support the production of cartilage, skin and horn, and actively support many metabolic processes. All these nutrients are combined in Golden Mineral to ensure that all your horse's needs are met. The special mix of herbs also enhances the availability of nutrients. Golden Mineral is, therefore, the ideal complete supplement for your horse.
