

Profi Intestine Fit

Concentrate

Feed supplement for horses

DarmFit is a raw fibre concentrate with insoluble fibrous components based on lignocellulose, which forms a network structure in the digestive tract to break up the digested food. This makes it considerably easier for digestive enzymes and microorganisms to penetrate the food and perform their task to ensure stable digestive processes. Profi DarmFit may stabilise the pH in the gastrointestinal tract, help to prevent incorrect fermentation, and support the physiological water re-absorption, especially in the large intestine. Thereby, the stool consistency may be significantly improved, reducing faecal water. Added brewer's yeast stabilises the sensitive intestinal flora of the horse and provides intact defence mechanisms as well as a strong immune system.

The benefits at a glance:

- low dosage
- with natural cell structures
- may support the prevention of faecal water
- high crude fibre content
- may stabilise the digestive processes

Recommended feeding:

Feeding recommendation:

20 g per 100 kg bodyweight per day

Composition: 70,0 % Lignocellulose, 8,0 % Grape seed flour, 5,0 % Dried beet pulp (molassed), 5,0 % carrots dried, 5,0 % Carrot pomace, 5,0 % Fruit (apple) pomace dried, 1,2 % Brewer's grains dried, 0,8 % Brewers yeast

Analytical constituents and levels: 3,50 % Crude protein, 1,20 % Raw fat, 53,00 % Crude fibre, 1,80 % Crude ash, 0,30 % Calcium, 0,06 % Phosphorus, 0,04 % Sodium
