

EMH Senior Müsli

Special Feed

Feed supplement for horses and ponies

The nutritional requirements of our horses can as they get older. As the need for high-quality vital substances, like essential amino acids and trace elements rises. If these requirements are not met, this can lead to problems with the coat change, increased susceptibility to infections, but also weight loss and loss of appetite. For this reason, we have continued to optimise the composition of our EMH Senior Muesli according to the latest research. High-quality amino acids support the maintenance and development of the muscular system, as well as body substance. In combination with higher levels of zinc, copper, manganese and selenium, partially as organic compounds, your horse's immune system can regenerate much faster. That way, existing deficits can be balanced and age-related deficiency symptoms prevented. By using EMH Senior Muesli, the availability of nutrients and active ingredients is improved and therefore the overall utilisation of the feed is optimised. With the formation of a protective barrier in the digestive tract and stimulation of the local immune system in the gut, all immune functions of the body are stabilised. With only small feed quantities, this muesli provides all necessary nutrients. The preserved structure promotes the chewing behaviour, an improved insalivation of the feed, and therefore for optimal digestion and feed conversion.

The benefits at a glance:

- for the prevention of age-related loss of condition
- promotes the chewing behaviour and improves insalivation of the feed
- appetising effect
- with high-quality vital substances, stimulates the immune system
- the nutrient composition is specially tailored to the needs of older horses

Recommended feeding:

Feeding recommendation:

for maintenance: approx. 200 g per 100 kg body weight per day
light to moderate work: approx. 250 g - 400 g per 100 kg body weight per day

With smaller quantities, we recommend adding a mineral supplement.

Composition: 37,0 % Barley (flaked), 30,2 % Corn flakes, 6,2 % Peas (flaked), 3,4 % Oat peel bran, 3,4 % Sugar beet molasses, 3,3 % Lucerne meal, 3,2 % Wheat bran, 2,0 % Chopped carob, 2,0 % Alfalfa hay (dried), 1,6 % Calcium carbonate, 1,5 % Dicalcium phosphate, 1,3 % Dried beet pulp (molassed), 0,7 % Sodium chloride, 0,6 % Corn, 0,6 % Fermented plant extract (EMH), 0,4 % Barley, 0,3 % Magnesium oxide, 0,1 % Brewer's grains dried, 0,1 % Sunflower extraction meal, 0,1 % Fruit (apple) pomace dried

Digestible protein (dCP): 77,0 g/kg
prececal digestible protein (pcvRp): 67,5 g/kg

Digestible energy (MJ DE): 11,6 MJ DE/kg
Metabolizable energy (MJ ME): 10,6 MJ ME/kg

Analytical constituents and levels: 10,50 % Crude protein, 2,60 % Raw fat, 6,20 % Crude fibre, 6,90 % Crude ash, 1,20 % Calcium, 0,50 % Phosphorus, 0,30 % Sodium, 0,20 % Magnesium, 0,45 % Lysine, 0,20 % Methionine, 42,40 % Starch, 4,80 % Sugar

Additives per kg: 16.500 I.E. Vitamin A (3a672a)^{NA}, 2.200 I.E. Vitamin D3 (3a671)^{NA}, 680,00 mg Vitamin E (3a700)^{NA}, 60,00 mg Vitamin C (3a312)^{NA}, 15,00 mg Vitamin B1 (3a821)^{NA}, 7,00 mg Vitamin B2 (3a825i)^{NA}, 7,00 mg Vitamin B6 as pyridoxine hydrochloride (3a831)^{NA}, 50,00 mg Niacin (3a314)^{NA}, 25,00 mg Calcium D pantothenate (3a841)^{NA}, 820,00 mcg Biotin (3a880)^{NA}, 7,00 mg Folic acid (3a316)^{NA}, 80,00 mg Choline chloride (3a890)^{NA}, 30,00 mg Iron (3b103) (iron (II) sulphate, monohydrate)^{NA}, 90,00 mg Manganese (3b502) (manganese (II) oxide)^{NA}, 130,00 mg Zinc oxide (3b603)^{NA}, 45,00 mg Copper (3b405) (copper (II) sulphate, pentahydrate)^{NA}, 0,65 mg Selenium (3b801) (sodium selenite)^{NA}, 1,00 mg Calcium iodate, anhydrous (3b202)^{NA}, 420,00 mg Diatomaceous (E 551c)^{TA}, 335,00 mg Propionic acid (1k280), 324,00 mg Propionsäure aus Natriumpropionat (1k281)^{TA}, 326,00 mg Propionsäure aus Calciumpropionat (1a282)^{TA}
