EMH Breeding Muesli

Breeding Feed

Feed supplement for horses and ponies

Highly pregnant and lactating mares, as well as growing foals, have high demands when it comes to the quantitative and qualitative supply of nutrients. EMH Stud Muesli contains a particularly high protein content and fully expanded cereals. The composition is perfectly balanced with all important vitamins, minerals and trace elements to suit the increased needs of horses. The muesli is universally usable for highly pregnant and lactating mares, weanlings and stallions. With its high-quality protein building blocks, fertility, lactation and sperm production are positively affected. The excellent taste also ensures an early feed intake of foals and, therefore, the perfect development of the animals. Due to the interaction of the top quality ingredients with EMH, mares are optimally prepared for the birth, and the healthy development of the foal in the womb is promoted. A short recovery phase after the birth enables the mare to produce adequate amounts of milk. EMH Stud Muesli ensures foals with vitality, productive mares and fertile stallions.

The benefits at a glance:

- demand-optimised ratio of trace elements
- balanced protein / energy ratio
- rich in essential amino acids
- balanced calcium / phosphorus ratio
- with ideal mineral and vitamin content

Recommended feeding:

Feeding recommendation:

pregnant mares:

- from 9th month: 300 g per 100 kg body weight per day
- until 11th month: 500 g per 100 kg body weight per day
- 1st - 3rd lactation month: 500 g - 650 g per 100 kg body weight per day

With smaller quantities, we recommend adding a mineral supplement.
Foals should only be given the muesli from their 4th week of life.
