

Weserland Mash getreidefrei

Special Feed

Feed supplement for horses

Mash has always been valuable in equine nutrition, because mash has many positive effects on digestion and regeneration. The cereal and wheat-bran components normally contained in a standard mash were purposely avoided in the formulation of our Weserland Mash, which is cereal-free and full of ingredients to promote a natural digestion.

Extruded linseed provides a high level of mucilage that lines the stomach and intestinal mucosa with a protective film. It can support the health of an intact mucous membrane, but also serves to regenerate the irritated and sensitive mucosa after illness, medication, worming or stress. The addition of unsaturated fatty acids has a positive effect on the skin and coat texture. Brewer's yeast provides important enzymes and natural B vitamins to promote an intact intestinal flora. Milk thistle oil and the easily digestible rice bran additionally provide valuable essential fatty acids, which can positively affect the entire metabolism and the immune system. Alfalfa is characterised by high-quality protein and is therefore ideal to provide the body with amino acids and support muscle growth. Tasty apple pomace provides highly valuable pectins.

Due to the deliberate avoidance of grain, wheat bran and molasses, Weserland Mash is also cereal-free and therefore ideal for metabolically sensitive horses and is optimal for daily feeding as an aid to healing (for example, after colic or difficult coat change).

The benefits at a glance:

- free from grain & wheat bran
- optimal in horses prone to colic or gastric ulcers
- ideal for feeding with metabolic disorders
- high in omega-3 & omega-6 fatty acids
- rich in raw fibre
- very tasty

Recommended feeding:

Feeding recommendation:

ponies: 300 g - 800 g per day
larger horses: 1000 g - 1500 g per day

Ideal 2 - 3 times per week as a replacement for the usual ration.
According to need and performance requirements or to enhance the feed.
Mix the mash with hot water, let it steep for about 10 minutes and feed it warm.

Composition: 21,0 % Fruit (apple) pomace dried, 21,0 % Linseed meal, 18,9 % Rice

husk bran, 16,8 % Linseed (extruded), 11,2 % Lucerne meal, 4,6 % Calcium carbonate, 2,6 % Milk thistle oil, 1,5 % Brewer's grains dried, 1,1 % Sodium chloride, 1,0 % Brewers yeast

Digestible protein (dCP): 135,0 g/kg
prececal digestible protein (pcvRp): 104,8 g/kg
Digestible energy (MJ DE): 13,2 MJ DE/kg
Metabolizable energy (MJ ME): 11,7 MJ ME/kg

Analytical constituents and levels: 16,30 % Crude protein, 14,20 % Raw fat, 13,00 % Crude fibre, 9,60 % Crude ash, 1,40 % Calcium, 0,60 % Phosphorus, 0,50 % Sodium, 6,10 % Starch, 6,80 % Sugar, 0,30 % Magnesium

Additives per kg: 1.465,00 mg Propionsäure aus Calciumpropionat (1a282) ^{TA}, 350,00 mg Propionic acid (1k280)

NA = Nutritional additives
ZA = Zootechnical additives
TA = Technological additives
SA = Sensory additives
