

Volaris GRAINball insects

Fat Ball

Our GRAINballs with insects provide protein, which is particularly important during the fledgling season. The protein in these fat balls provides wild birds with a quick source of energy. They are suitable for all kinds of birds and can be fed all year round.

The benefits at a glance:

- for all species of birds
- with peanuts, dried fruit and insects
- for year-round feeding

Composition: Corn (broken), Wheat (flaked), Oils and Fats, Barley (flaked), Calcium carbonate, Sunflower seeds, Peanuts, Insects, dried, Raisins
